Projects:-

EVOLVE – Social Platform

- Developed EVOLVE, a full-stack social media platform enabling post creation, real-time feeds, messaging, profile search, and social interactions (likes, comments, follows) using React, HTML, CSS, JavaScript, Node.js, Express.js, and MySQL.
- Implemented secure authentication and session management with JWT, bcrypt password hashing, and CORS, ensuring protected API access and reliable user data handling.
- Engineered dynamic features including an analytics dashboard, dark/light theme, and responsive UI while designing scalable REST APIs and optimized database queries for efficient performance.
- Deployed the application on Render with a modular full-stack architecture for maintainability and scalability.

Garam Masala – Restaurant Application

- Developed GARAM MASALA, a multi-vendor restaurant ordering platform supporting Admin, Restaurant, and User roles, enabling restaurant onboarding, user registration, and centralized platform management using Node.js, Express.js, and MySQL.
- Implemented restaurant-side features for menu management, order tracking, and sales monitoring, while allowing users to browse dishes, add items to cart, and place orders through a responsive HTML, CSS, and JavaScript interface.
- Engineered secure backend services with RESTful APIs, integrating bcrypt password hashing, session-based authentication, and CORS to ensure protected access and reliable data handling.
- Deployed the full-stack application on Render, maintaining a modular architecture for scalability and efficient database-driven order management.
